

ANNUAL POLICING PLAN

For the Calendar year 2022-2023
(Chapter-IV, Article-32 of Police Order-2002)

DISTRICT JHELUM

District Police Officer
Jhelum

Introduction

Appreciation of scope and challenge of policing in a district requires, among other things, an understanding of certain peculiar characteristics of the district. Such features as geography, population, degree of urbanization, level of commercial and industrial activity, installations and places requiring fool proof security and relative importance of the district in the national context have a direct bearing on the nature of policing. In ancient days Jhelum was known as **Jalham**. The word Jhelum is reportedly derived from the words **Jal(pure water)** and **Ham (snow)**. The name thus refers to the waters of a river (flowing besides the city) which has its origin in the snowcapped Himalayas.

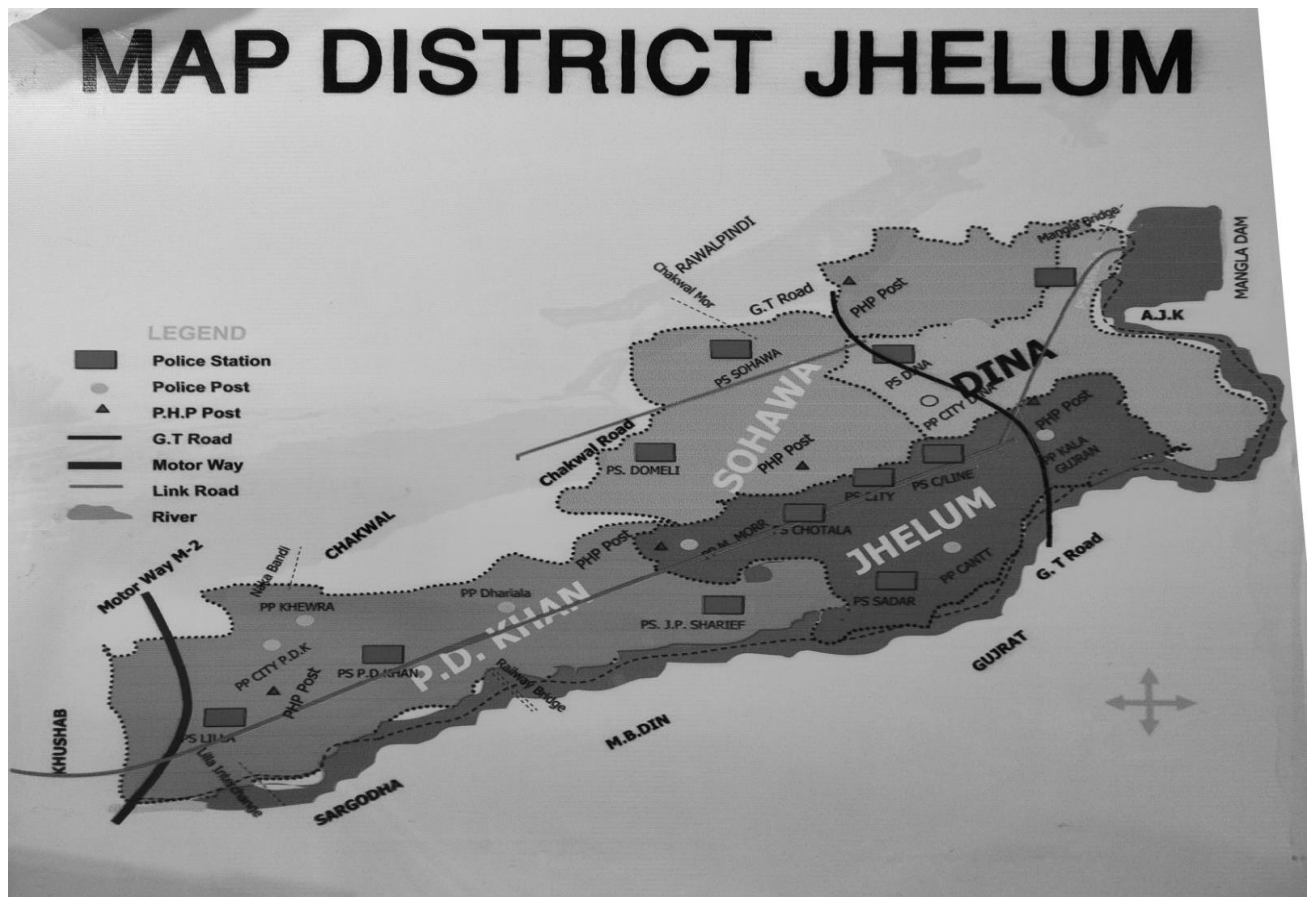

Jhelum is one of the oldest districts of the Punjab. It was established on **23.03.1849**. It spreads over an area of **35873 Sq.KMs** and has a population of **15,23,118 persons**. This district has great historical importance with very rich heritage. This area has been the route of foreign invaders for centuries. The district consists of four Tehsils i.e., Jhelum, Dina, Sohawa and Pind Dadan Khan. Country's main railway track i.e., Peshawar to Karachi main line passes across the district East to West from Jhelum, Dina and Sohawa as main stations. National Highway i.e., main Lahore-Karachi Road runs parallel to the main railway track. **It shares its boundaries with Gujrat, Mandi Baha-ud-Din, Mirpur (AJK), Rawalpindi, Chakwal, Sargodha and Khushab districts**. The major portion of the terrain consists of hills. River Jhelum marks the eastern boundary of this district.

Jhelum is **762** feet above the sea level. The highest point of Jhelum is known as "**TillaJogian**" which is located **3200** feet above the sea level. The weather invariably remains dry. Average rain fall is **74.5 m.m** per annum. The temperature remains **20C** in winter and **42.3 C** in summer. The cultivation almost depends on rain fall. **Most** of the area is "**barani**".

There are also tube wells in Tehsil Jhelum, part of Dina and Pind Dadan Khan which are used for agricultural purposes. There are also **three small water dams** two i.e., "**Teenpura**", "**Garate**" dam in Dina Tehsil and one i.e., Jamargal Dam in P.S Chotala Tehsil Jhelum. The water of these dams is also used for cultivation purposes. **The major crops** of the districts are wheat, corn and maze. Salt and coal are derived from Pind Dadan Khan area.

The population mostly consists of **Kashmiri, Gujjar, Rajput, Jatt, and Awan** tribes. The **major profession** of people is service in **Armed Forces**; hence they are generally disciplined and law abiding. **A large number of people** of this district are settled in foreign countries particularly **Western Europe**. Main source of livelihood of the people is **agriculture**. District Jhelum has few industries like **Pakistan Tobacco Company Cement Factory and ICI Soda Ash Factory**. There is no labour unrest and over all situations is quite peaceful.
